

Chris Strong, warning coordination meteorologist at the National Weather Service's Baltimore/Washington forecast office. " It's just not that kind of system. " # The snow is expected to arrive by Saturday afternoon or evening, becoming most intense Sunday morning and tapering off by Sunday afternoon. A winter weather advisory is in effect for the Baltimore region from 7 p.m. Saturday through 10 a.m. Sunday. # There was significant agreement among forecasters in those predictions, though Foot's Forecast suggested as much as a 40 percent chance that some areas could get as much as 7 inches of snow. The forecast could be adjusted as the system approaches. # How much snow will we get? Here's what the National Weather service is predicting. # It was moving through the Plains and Midwest states Friday, expected to bring snow from Kansas to Ohio. It was forecast to move into the Southeast on Saturday and transfer its energy to a low-pressure system moving up the Atlantic coast Sunday. # State Highway Administration officials said they were pre-treating major roads around the state Friday and Saturday with a salt brine spray that could help prevent or delay snow from accumulating on pavement. And they were also readying plows and other snow removal equipment to put in action once snowfall began, especially in Southern Maryland and on the lower Eastern Shore. # Gov. Larry Hogan urged residents to stay off roads during the storm and to heed all warnings from the weather service or other public safety agencies. # " As we prepare for this winter weather, I urge all Marylanders to use common sense and take all necessary precautions, " he said in a statement. # The storm's heaviest accumulation is forecast along the Appalachian mountains of
